UPPCO Planned Outage for Seney, Germfask, Blaney Park, and Gulliver

Ishpeming – Upper Peninsula Power Company will have a planned outage impacting its customers in Seney, Germfask, Blaney Park and Gulliver on Saturday, October 11 from 2 a.m. to approximately 5 a.m. (EST).

The scheduled outage is necessary in order to perform needed work at the UPPCO Seney substation to improve reliability.

“We realize that even scheduled outages are inconvenient, however this work will help UPPCO continue providing safe and reliable electric service to its customers,” said Steve Lillie, customer service manager. “This work can’t be done safely with the substation energized, so we timed the outage for the early morning hours to help minimize inconvenience to our customers.”

UPPCO customers having any questions about this planned outage can call the company’s customer service number at 800-562-7680.
