

Small Businesses Can **SAVE BIG** With **FREE** DIY Audits

Efficiency UNITED
Offers Energy-
Saving Resources
Online

Saving energy doesn't stop

at home. That's why Efficiency UNITED and Upper Peninsula Power Company offer a do-it-yourself online energy audit to help Michigan businesses learn where they can save energy and money.

The audit is part of Efficiency UNITED'S Energy Depot®, a set of online tools and resources to help you better understand and manage your business's energy use and costs.

Among the tools is

a free Online Commercial Profile. You complete an online energy audit, and Energy Depot will provide you with a personalized report online. Your report will then include an energy profile with an estimate of your energy costs for each system or appliance.

After your audit, use the Energy Library to learn more about the systems you use, compare existing systems to a range of new systems, and find other ways your business can use energy more efficiently.

Getting started is easy. Access the Energy Depot tools on the UPPCO *For Your Business* section at www.unityenergy.com, or call **877-367-3191** to speak to an Efficiency UNITED energy advisor.

Safely This Spring

Call 811 Before Digging & Plant
A Safe Distance From Power Lines

Planting trees, putting up a fence—whatever your outdoor project this spring, stop and think before you start. You can avoid potential hazards from buried and overhead power lines.

Dig Safely Call 811 to have your buried lines located at least three business days in advance, for free. Once utility lines are marked, remember to dig a safe distance away—at least 4-6 feet.

Plant Trees Away From Power Lines Before planting, always call 811 to find out if there are utility lines in the area. Always keep your hands and equipment away from overhead lines, and avoid planting trees where they'll grow into power lines.

Follow these simple planting guidelines to enjoy your trees and avoid issues as trees reach mature heights.

Mature Tree Height	Distance From Power Lines
Up to 15 feet	15 feet
15-20 feet	20 feet
20-50 feet	30 feet or more
50+ feet	at least 50 feet

Retire Your Old Fridge Or Freezer & EARN EXTRA CASH

Save Energy & Get \$50 Cash Back

Save up to \$150 a year on energy costs and get cash back for recycling your old refrigerator or freezer, thanks to the Appliance Recycling Program from Efficiency UNITED and UPPCO.

The Appliance Recycling Program helps lower your energy use, reduce your energy bills and keep harmful materials out of landfills. Plus, you'll get \$50 back for recycling your old working, plugged-in refrigerator or freezer. At the same time, recycle your old dehumidifier or room air conditioner and earn an additional \$15 cash back.

Visit www.unityefficiency.com for more about the Appliance Recycling Program, or call 877-367-3191 to schedule your FREE pick-up.

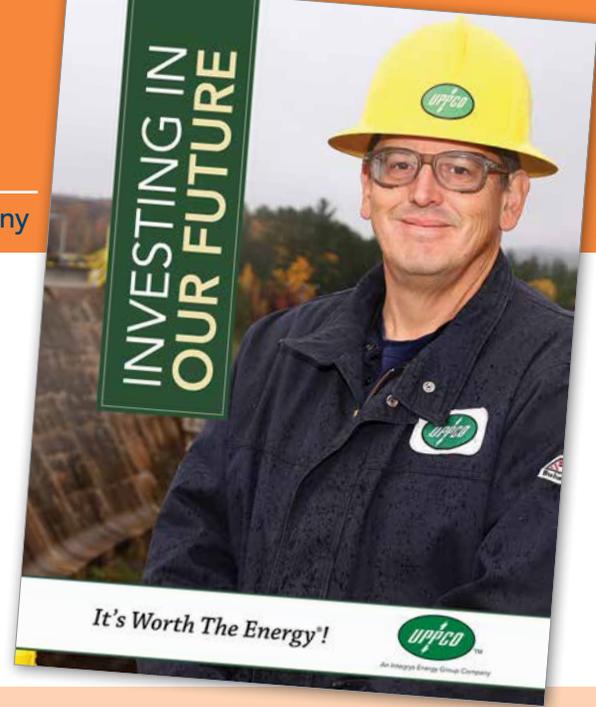

INVESTING IN OUR FUTURE

Corporate Citizenship at Upper Peninsula Power Company

BEING A RESPONSIBLE COMPANY MEANS MORE NOW THAN EVER. Good businesses have always looked for ways to give to worthy causes and help the environment. But today, we must do even more. Society calls upon us to be accountable not only through voluntary efforts but in the course of business itself. At UPPCO, we bring the principle of responsible decision-making into every aspect of our daily work. We believe *It's Worth the Energy®!*

We invest in improvements that will deliver reliability, safety, convenience and value for our customers.

You can read more about corporate citizenship at UPPCO in *Investing In Our Future*, a report available at uppc.com/community.

When Renovating Remember To MIND YOUR METER

Never Move Or Cover Your Meters

If you're planning a remodeling project this spring, stay safe and avoid potential service disconnection by keeping your electric meter in mind.

UPPCO regularly inspects the electric meters for your home. Occasionally, technicians discover that meters have been moved without our authorization. If you're building a deck or planning an addition to your home:

- **Never move your meter.**
- **Do not build over or cover your meter.**

When done incorrectly, moving meters creates the risk of fire or failure. And it's not just dangerous. Tampering with meters and other equipment owned by UPPCO violates federal law. Covering your meter — for example, by building a deck over it — also prevents us from performing important maintenance work that allows us to deliver safe, reliable electricity to your home.

If you're interested in moving a meter, please call 24-hour Customer Service at 800-562-7680 to request the relocation. We'd be happy to help!
