

Upper Peninsula Power Company

Application for Standard Meter Opt-Out

Please contact us at (906) 449-2013 or (800) 562-7680 before submitting this Opt-Out Application and fee; it is important that you understand the costs and conditions for opting out of UPPCO's Smart Energy standard metering program.

Eligibility: A residential customer's meter must be accessible to UPPCO employees and the customer must have zero instances of unauthorized use, theft, fraud and/ or threats of violence toward the Company in order to be eligible to participate in the standard metering opt-out program.

Applicant hereby understands that they will not receive the benefits of UPPCO's Smart Energy standard metering program, including:

- Automated meter readings eliminating the need to have a representative visit their home to read their electric meter,
- Access to beneficial information that they might use to reduce their energy consumption and monthly energy bills, and
- Improved outage restoration times.

Applicant agrees to pay the following standard meter opt-out charges, as approved by the Michigan Public Service Commission in Case No. U-20276:

- A one-time fee of \$62.25 per meter for each service address, and
- A recurring monthly meter-read charge of \$14.26 per service address per month. The recurring monthly charge will be assessed following deployment of standard meters in the Applicant's area.

Applicant hereby requests a non-standard meter (analog or digital) be installed by UPPCO at the service address listed below. Applicant agrees to provide reasonable access to UPPCO's metering equipment and further acknowledges the use of a non-standard meter may cause certain costs to be incurred for which Applicant is solely responsible.

Customers that opt-out of UPPCO's standard metering program must provide reasonable access to UPPCO for meter-reading and routine maintenance. If a customer fails to provide access for two months (consecutive or non-consecutive) in any 12-month period, the customer will be required to: (a) pay any/all costs required to relocate UPPCO's non-standard metering equipment to an accessible external location; or (b) permit the company to install a standard meter.
