ADDITIONAL INFORMATION:

SERVICE READY DATE: *(date that initiates scheduling of service installation)*

Date Site will be Ready for Service: _____

PLEASE NOTE: The following requirements must be completed before service can be installed.

- Site sketch waiver must be received.
- Foundation must be backfilled and within 6" of final grade.
- Service route cleared 10' wide of brush, etc.
- The electric meter base must be installed.
- Easements need to be signed and on file.
- Some construction charges are to be paid in advance.

Other Important Details:

- It's important to contact the utility if there are changes to your site.
- When your service requirements are met, and we are notified that your site is ready, service installation typically begins within 10 business days. After the electric is installed and your Electrical Inspection is received, the meter is typically set and energized within three business days. This timeline is dependent on the complexity of your job, weather, road restrictions, and crew availability.
- Winter Construction Charge may apply.

If no existing or future proposed private facilities on the property check here

At the time of construction, all existing or proposed private underground facilities must be marked or exposed before service can be installed.

Construction Authorization / Underground Damage Liability Waiver:

I certify that I own or am the authorized representative of the owner of the property of the service address indicated on this Property Site sketch, and that I have read and understood the above statement regarding marking and / or exposing all private underground facilities. I furthermore agree to hold Upper Peninsula Power Company and/or its agents harmless for any damage to private underground facilities that occurs during the installation of gas or electric service as a result of failure on my part to ensure that the private underground facilities on this property have been adequately marked and / or exposed.

Signature: _____ Date: ____/____/____
