ADDITIONAL INFORMATION:

SERVICE READY DATE: *(date that initiates scheduling of service installation)*

Date Site will be Ready for Service: _____

PLEASE NOTE: The following requirements must be completed before service can be installed.

- Site sketch waiver must be received.
- Foundation must be backfilled and within 6" of final grade.
- Service route cleared 10' wide of brush, etc.
- The electric meter base must be installed.
- Easements need to be signed and on file.
- Some construction charges are to be paid in advance.

Other Important Details:

- It's important to contact the utility if there are changes to your site.
- When your service requirements are met, and we are notified that your site is ready, service installation typically begins within 10 business days. After the electric is installed and your Electrical Inspection is received, the meter is typically set and energized within three business days. This timeline is dependent on the complexity of your job, weather, road restrictions, and crew availability.
- Winter Construction Charge may apply.
